

# Instructions for Using Geogebra

---

## A. How to plot a point on a Geogebra interactive graph:

1. Click on the **Point** icon  located on the interactive graph's toolbar.

2. Select **Point**  from the dropdown menu.

3. Left-click once anywhere on the interactive graph to plot a point.

**Note:** If you plot a point that you wish to delete, use the **Undo**  **Undo** function or select the point that you wish to delete and click **Delete**. Both the Undo and Delete functions may be found under the **Edit** menu item located on the interactive toolbar's menu bar.

## B. How to connect two or more points on a Geogebra interactive graph and connect them:

1. Click on the **Line** icon  located on the interactive graph's toolbar.

2. Select **Segment**  from the dropdown menu:

3. Click once on any point on the interactive graph, then click on another point to which you wish to connect. Repeat the process until desired points are connected.

**Note:** When you finish connecting all desired points, click on the **Move** icon  located on the interactive graph's toolbar to quit connect mode!
