

## 4.03 Race and Labor Discussion Scoring Guide

---

### Total Points: 20

First, review the article [An Overview of Economic, Social, and Demographic Trends Affecting the U.S. Labor Market](#) that you read earlier in the lesson. The article provides evidence of gaps between certain groups within the labor market.

Next, go to the **4.03 Race and Labor Discussion** and write a post discussing the factors that can be attributed to these gaps, including the gaps between genders and racial / ethnic groups. Consider whether or not discrimination is the main cause, or if the data is too aggregated to make that determination.

After posting an original thread, read over your classmates' posts. Write thoughtful responses to at least two of your peers.

### Scoring Guide:

- 10 points for original post that fully addresses the prompt
- 10 points for responding to your classmates
