

3.07 Reforestation Scoring Guide

Total Points: 45

For this task, let's say all these things are true:

- You have been working as a Consulting Forester in Alabama
- You own 55 acres of forestland, which have been contracted to harvest
- The harvest method is to be clearcut
- Your objectives as the landowner is timber production for financial gain and restoration
- You have decided to reforest your land with longleaf pine seedlings
- The method of reforestation you have chosen will be hand-planting
- You will buy the longleaf seedlings yourself
- You will also hire your own planting team

Create a presentation that describes how to protect, plant, and establish (ensure the survival) your new longleaf pine seedlings.

Your presentation should include

- a title slide at the beginning **5 points**
- at least one slide with information, including at least one image, on how to care for seedlings **10 points**
- at least one slide with information, including at least one image, on how to plant the seedlings **10 points**
- at least one slide with information, including at least one image, on how to establish the seedlings **10 points**
- be sure to include where you plan to purchase your seedlings and who plan to hire to plant them (this information may be on one of the other slides) **5 points**
- a citation slide at the end **5 points**
