

# Unit 4 Nutrition and Technology Project Overview – Individual

---

In this unit, you will be completing a research project individually. You will research and evaluate types of technology used in delivering dietary planning and nutritional services and prepare a slide show presentation of your findings. In every lesson throughout this unit, you should be working on this project; however, these are not the only assignments in Unit 4.

There is also a group work option for completing this research project. You will see directions for groups, as well as instructions for individual participants. You should follow the individual instructions only, and some parts of this project you won't complete. For example, you will not post to the **Unit 4 Group Work Discussion** board, as that is only for groups to communicate and share work while completing this assignment.

## Project Steps and Assignments by Lesson

Detailed directions are provided within each lesson, but it is always a good idea to read through the steps before beginning a project! Read each step of the project below, including the graded and ungraded requirements and expectations along the way. **Note:** The following are not the only assignments in this unit.

### Lesson 4.01

- Brainstorm and think of project ideas. You don't have anything to turn in during this lesson. However, you should begin planning how you will complete your research project. Email your teacher if you need assistance. (ungraded)

### Lesson 4.02

- Each individual will research and complete three website evaluations to find resources for this project. Submit your website evaluations to the **4.02 Resource Evaluations Dropbox** (graded).

### Lesson 4.03

- You don't have anything to turn in during this lesson. However, you should continue to research your project and perhaps even begin the writing process! (ungraded)

### Lesson 4.04

- You will complete a write-up about a technology, software, or hardware that you've discovered during your research. Submit your tech write-up to the **4.04 Tech Write-Up Dropbox** (graded).

## Lesson 4.05

- Each individual should complete a first draft of your research project presentation. Submit a rough draft of the presentation to the **4.05 Peer Review Discussion** and provide feedback to other individuals in your class. You will use the provided Peer Editing Checklist to guide your peer review (graded).

## Lesson 4.06

- Revise your first draft based on peer review feedback and compile your final draft. Turn in the final draft presentation to the **4.06 Final Presentation Dropbox** (graded).
